## OBJECTIVE

As an aspiring B.Tech student proficient in range of technologies including React.js, Next.js, Java and JavaScript ,I am actively seeking a Full Stack Developer role. With a keen interest in utilizing my problem-solving abilities and collaborative skills, I am enthusiastic about working in teams to develop innovative solutions and ensure high-quality outcomes.

## EDUCATION

**Btech CSE**, DIT University                                              Expected 2024
Cgpa : 7.98

## SKILLS

| | |
|---|---|
| **Technical Skills** | React JS ,Next.js , JavaScript , Java, HTML, CSS, SQL, MongoDb, Git , Node js, ReactNative |
| **Soft Skills** | Teamwork, Leadership, Time Management, Flexibility, Patience |

## PROJECTS

**DIT UNIVERSITY — PROJECT ( UniReuse )**   (Try it here)

Tech Stack: React Native for mobile development, Express.js for backend, and Mongoose for database management.

Description: Developed a marketplace and financial management app tailored for college students in collaboration with two team members. The app addressed the unique financial management needs of college students while providing a user-friendly marketplace platform.

**Video Streaming Backend**   (Try it here)

Tech Stack: Node.js, Express.js, MongoDB with Mongoose

Description: Built a scalable backend for a video streaming website. Leveraged Express.js for rapid API development, while MongoDB with Mongoose handled data storage efficiently. Implemented features including video upload, deletion, commenting, liking, and user authentication to enhance user experience.

**Food Order App** (Try it here)

- Developed an enhanced user interface for the Food Order App by proficiently utilizing React.js, including the effective implementation of React hooks.
- Utilized Fetch API methods, including POST and GET, to interact with Firebase Realtime Database, ensuring seamless storing and retrieval of meals data and enhancing app functionality.
